CONTENTS

J. D. Achenbach: Shear waves in finite elastic strain 306
W. F. Ames (*see S. E. Jones*)
Ergun Ar: On the low frequency acoustical scattering of a plane wave from a soft spindle at nose-on incidence 285
G. E. Barr: On the diffraction of a cylindrical pulse by a half-plane 193
R. E. Bellman, H. H. Kagiwada, R. E. Kalaba and S. Ueno: The invariant imbedding equation for the dissipation function of a homogeneous finite slab. . . . 304
C. E. Billigheimer: Solutions of a nonlinear partial differential equation of hyperbolic type 19
J. Boersma: Uniform asymptotic solutions of discontinuous initial value problems for dispersive hyperbolic equations 31
D. E. Carlson: On Günther's stress functions for couple stresses. 139
M. M. Carroll: On circularly-polarized nonlinear electromagnetic waves. 319
H. S. Y. Chan: Minimum volume design of frameworks and discs for alternative loading systems. 470
Clive R. Chester: Reduction of the third boundary value problem by means of harmonic functions. 335
S. Bart Childs (*see Robert Wm. Little*)
Paul M. Chirlian: The effective bandwidth of a system. 311
Y. P. Chiu (*see Ting-Shu Wu*)
S. C. Chu and F. T. Metcalf: Pointwise bounds for solutions of a class of functional equations. 441
George B. Clark, Gerald B. Rupert and James E. Jamison: Series transform solutions for Voigt transients 349
R. J. Clifton: A difference method for plane problems in dynamic elasticity . . . 97
N. Coburn: Generalized Prandtl-Meyer waves in relaxation hydrodynamics . . . 147
J. L. Ericksen: Twisting of partially oriented liquid crystals. 474
A. D. Fine: Continuity conditions at wave fronts in coupled thermoplasticity . . 121
A. D. Fine: Errata sheet for paper"Continuity conditions at wave fronts in coupled thermoplasticity" 491
M. D. Greenberg: On the laminar flow analogy and its application to limit cycle synthesis. 187
D. L. Hector (*see W. E. Olmstead*)
William C. Hoffman: The neuron as a lie group germ and a lie product 423
N. C. Huang (*see W. Nachbar*)
R. R. Huilgol: Finite amplitude oscillations in curvilinearly aeolotropic elastic cylinders. 293
James E. Jamison (*see George B. Clark*)
S. E. Jones and W. F. Ames: Equations equivalent to a first order equation under differentiation. 302
D. D. Joseph and W. H. Warner: Parameter values excluded by existence conditions for bouyant dissipative motions in vertical channels. 163
H. H. Kagiwada (*see R. E. Bellman*)

R. E. Kalaba (*see R. E. Bellman*)
L. M. Keer: Coupled pairs of dual integral equations 453
Lawrence A. Kennedy (*see D. A. Preleweicz*)
Ladis D. Kovach and Ronald V. Larsen: Approximations with rational polynomials 463
Richard E. Kronauer (*see Samuel A. Musa*)
David Langford: Pseudo-similarity solutions of the one-dimensional diffusion equation with applications to the phase change problem 45
Ronald V. Larson (*see Ladis D. Kovach*)
Morris E. Levenson: A numerical determination of subharmonic response for the Duffing equation $\ddot{x} + \alpha x + \beta x^3 = F \cos \omega t$ ($\alpha > 0$) 11
John N. Lienhard and Paul L. Meyer: A physical basis for the generalized gamma distribution 330
Robert Wm. Little and S. Bart Childs: Elastostatic boundary region problem in solid cylinders 261
W. S. Loud: Phase shift and locking-in regions 222
J. Lublinear and J. L. Sackman: On uniqueness in general linear viscoelasticity . . 129
A. G. Mackie: The nonlinear oscillations of a string 468
J. J. Mahony: The reflection of short waves in a variable medium 313
M. Maiti: A note on the integral equation methods in potential theory 480
F. T. Metcalf (*see S. C. Chu*)
Paul L. Meyer (*see John N. Lienhard*)
L. W. Moreland: Rolling contact between dissimilar viscoelastic cylinders. . . . 363
Jürgen Moser: On nonoscillating networks. 1
N. Mullineux and J. R. Reed: On a class of integral equation 327
Samuel A. Musa and Richard E. Kronauer: Sub- and superharmonic synchronization in weakly nonlinear systems: integral constraints and duality. 399
W. Nachbar and N. C. Huang: Dynamic snap-through of a simple viscoelastic truss 65
W. E. Olmstead and D. L. Hector: The lift and drag on a flat plate at low Reynolds number via variational methods. 415
E. Ott and J. Shmoys: Transient aspects of transition radiation 377
Yih-Hsing Pao (*see Stephen A. Thau*)
D. A. Prelewicz and Lawrence A. Kennedy: Solar radiant heating of a rotating solid cylinder 324
J. R. Reed (*see N. Mullineux*)
Frank J. Rizzo: An integral equation approach to boundary value problems of classical elastostatics 83
Gerald B. Rupert (*see George B. Clark*)
J. L. Sackman (*see J. Lublinear*)
P. R. Sethna: An extension of the method of averaging 205
Zee Shen: A solution of Van der Pol's differential equation 299
B. Sherman: A free boundary problem for the heat equation with prescribed flux at both fixed face and melting interface 53
J. Shmoys (*see E. Ott*)
A. R. Shouman: An exact general solution for the temperature distribution and the composite radiation convection heat exchange along a constant cross-sectional area fin 458
Manohar Singh: Small finite deformations of elastic dielectrics. 275

L. Sirovich and J. K. Thurber: On some mathematical aspects of kinetic model equations 175
G. F. Smith: Tensor and integrity bases for the gyroidal crystal class. 218
J. L. Synge: Directivity for one-dimensional scalar radiation 317
Stephen A. Thau and Yih-Hsing Pao: A perturbation method for boundary value problems in dynamic elasticity 243
J. K. Thurber (*see L. Sirovich*)
S. Ueno (*see R. E. Bellman*)
W. H. Warner (*see D. D. Joseph*)
Yechiel Weitsman: A note on singularities in a Cosserat continuum 213
Yechiel Weitsman: Two dimensional singular solutions in infinite regions with couple-stresses 485
Ting-Shu Wu and Y. P. Chiu: On the contact problem of layered elastic bodies . 233
